

MECH ERSE

ABOUT MECHVERSE

MechVerse is a blockchain-enabled fictional universe inspired in “near future space exploration” and that revolves around the creation of Mechanized Robots (Mechs), the discovery of new lands and the desire of the human spirit to go beyond their own limits.

We aim to build an online universe with a community first approach. To date, we have involved our members in our decision making process. We will strive to continue doing that as we reach our milestones and reward them handsomely for it. It is in our DNA to empower our members as they benefit from the growing network effects.

MechVerse will have something for every type of player: whether they seek to partake in the community, play to earn, have for goal to be rewarded for content creation, or purely as a means to generate passive income.

BLOCKCHAIN ENABLED ENTERTAINMENT

The Distributed and Decentralized nature of the blockchain technology makes it a well-suited system to build on top of for access control and digital assets ownership management.

Both, access and digital assets, are transactionally based and its ownership can be transferred in a permission-less environment as the distributed ledger where blockchain is build on.

All these transactions, when moved to the blockchain, are now assets that can be used, leveraged upon, rented and distributed as they were never before. This turns any fandom into something not only a community can enjoy but also as a profitable stream for the creator; which is a stark contrast to the legacy world where it was locked by private and centralized ownership models. In essence, this empowers content creators along with members of the network via various channels so they can reap rewards of the network effects.

FUNCTIONAL NFTS

The NFT market had a combined annual spend of \$1 trillion dollars in 2020-2021.

<https://loupfunds.com/the-1-trillion-nft-market/>

This new asset type is in high demand due to its artistic nature, its relationship and integration with blockchains and its transaction-first origin. There are many categories of NFTs, but the predominant one is the artistic/collectible one. However, we believe that a new category will start to grow at exponential pace: the Functional or Utilitarian NFTs. Functional NFTs are the ones that are hold not only because they are beautiful or transferable, but that provide a usage beyond it.

We believe that this influx of NFT creative minds will lead to the next decentralized Hasbro, the next decentralized Disney, the next decentralized Nintendo.

THE TEAM

The Developers on the team have more than 20 years of experience in heavy traffic applications, fintech, agtech, advertisement and consumer applications, movies and games. They have experience in Crypto trading and have been following and participating in the Cardano ecosystem for the last couple of years.

“The Artists, Designers” and creative minds on the team have vast experience in Movies, Short Films, Television and Advertising. All of our art and design is produced and owned by the creators, crafted with high quality and great content in mind. All of the unique pieces created thru the expansion of the **MechVerse** will be available to collect as NFT artifacts.

At the moment we have chosen to stay anonymous for various reasons but some of us do plan to reveal our real identities, while others might choose to keep their real identities private. We are three cofounders supported by a team of talented contractors.

BOLT

Creator by nature, Bolt has worked in multiple fields as a Graphic Designer, Writer and Software Engineer. Has worked for more than 12 years in Large Organizations (From Multinational Advertisement agencies to Silicon Valley Unicorns and Forbes 500 Companies) leading Engineering and Creative teams to deliver high quality and scalable products.

THE ARMORER

Passionate about storytelling and visual development, director of films and animation, with more than ten years in different entertainment industries such as TV, advertisement, and feature films as director, 3D artist and creative.

COSMIC VOID

Over 10 years of engineering experience in companies of all sizes with a skillset including but not limited to: Marketing/Advertising in Forbes 500, Machine Learning at FAANG, Front End Web experience in both medium size companies and startups. Cosmic Void has strong experience leading engineering teams, creating processes, launching products, and building UX/UIs alongside designers, product owners, and engineers.

MECHVERSE MEMBERSHIP

The **MechVerse** Pass (TrailBlazer, Pioneer, Regular) will be the only way a user can access our products and experiences.

When accessing one of the **MechVerse** digital properties (games, metaverse, streaming video, eReader), you will need to have a MechVerse Pass in your wallet to be able to access the content, or create a MechVerse account with your linked wallet to verify your access. Future tiers will enable added benefits in various forms all elevating the experience in the MechVerse as well as potentially in the "real" world.

TRAILBLAZER PASS

This Member Pass NFT will be offered to all Season 1 MechVerse Units NFT Collection Owners. This pass will give you perpetual access to the MechVerse Universe content (no need to renew annually), also will give you priority access to IDO and NFT Releases ahead of other members.

PIONEER PASS

This Member Pass NFT will be offered to all Ignis Land Owners by the time of minting. This pass will give you perpetual access to the MechVerse Universe content (no need to renew annually).

REGULAR PASS

This Member Pass NFT will be available for minting at any time in our main web vending machine. This pass will give you access to the MechVerse content (games, streaming video, eReader).

The MechVerse Pass will have a validity of one year after the purchase date.

MECHVERSE: ORIGIN GAME

MECHVERSE: ORIGIN

The core objective of the Outpost is to serve you as your home base to explore the vast MechVerse Universe. To Accomplish that, you will need to defend your settlement from pests, build and craft artifacts to automate the work, and finally build a probe that will allow you to go to other planets of the MechVerse and claim them for your clan.

is a base-building strategy games (Like Rimworld, Factorio and Stardew Valley) inspired in space exploration embedded with Functional NFTs.

The **MechVerse** will work online and available for Browsers in Desktop and Mobile devices.

MECHVERSE LORE NFTS

MechVerse Universe inspired unique art will be minted for our members to own. This will be high quality art pieces with low minting counts and offered exclusively only to our MechVerse Member Pass holders. We have worked with creatives in the space, completing 3 detailed Lores related to factions in MechVerse. This will ensure a strong foundation for the story line, engaging the player by immersing them in it.

ORIGIN NFTS

MechVerse:Origin is our first game in development. This slow paced Base-Building game will have NFTs at its core. All the units, pieces and places will be owned by the players in the form of NFTs.

Commanders manage an outpost in an interplanetary universe called MV1. They are able to choose their own path at any time whether it is: crafting resources, creating experiences, gaming, or creating their own way to reap profits from the economies.

The blockchain enabled world will have for goal to provide financial freedom for the unbanked and those that want to play to earn, as well as supporting several NGOs with donations of money, NFTs or both.

LAND SELECTOR

**PRIVATE
LAND**

**LORE
LAND**

**PUBLIC
LAND**

Can Buy / Can Mint
Regular Rates

Can't Buy / Can't Mint
Limited Drops

Can't Buy / Can Mint
Low Rates

MechVerse players will be able to buy Land NFTs of each one of the 10 planets of MV1 (**MechVerse** Planetary System) starting with Ignis (The Fire Planet).

In Ignis we will offer 15.000 hexes for sale that can be used for Outpost building, resource extraction or renting to other players.

PRIVATE LANDS

Every Pioneer Pass holder will receive an Outpost by default, but will have the opportunity to buy up to 10 hexes. Each player will be able to assign a Clan to their Outposts giving them higher special abilities to craft special artifacts, mine certain resources faster or trade in the MechVerse Merchant with other players of the same clan at lower fees. The First Pioneers will be able to access their settlements in highly prosperous and rich environments, and will be given some support tools to enhance their first arrivals.

RENTED LANDS

Private Lands can be rented. The arrangement of the rent will be agreed by the lender and the tenants

PUBLIC LANDS

All Regular Pass Holders that don't own Land will play from a shared Outpost area. They will, as well, be able to Rent an Outpost or fight and win matches to buy their own Outpost Land. Other way of winning at MechVerse:Origin is by gathering resources from Public Lands. There will be 1.500 pieces of Land that are accessible to every MechVerse Member that is not a Land Owner. Each one of this Lands will have limited resources and the drop rate will be limited. This will be an available resource for players that don't have enough capital to access their own lands.

LORE LANDS

This Hexes are not for rent and will NOT be available for mining. Lore specific locations will contain stories and special vending machine systems to drop unique NFTs and content to players.

MECHVERSE COLLABORATION NFTS

The **MechVerse** will join creative efforts with artists and creators to launch new content (Youtube Videos, Short Stories, Art Pieces), this new set of content will be available for minting in the **MechVerse** Merchant Station. Our creators will be reaping a percentage of all sales and as well any resell as per smart contracts in the future.

RESOURCES AND CRAFTING NFTS

MECH UNITS NFTS

In **MechVerse:Origin** all the actions taken in the game are done by Mechanized Robot units. Each Unit type can only execute specific actions. For example, the Private Mech is required to battle, craft, and mine.

Our first collection will be focused on Military Units (Privates, Squad Leads and Corporates), nevertheless more unit types will be delivered later to automate regular tasks as the Outpost is transformed into a Settlement.

Mech Units will share different color parts that will give extra boost for different abilities, until game mechanics are set in stone we cannot determine to what exact effect they will increase but at the time of writing:

- *Black parts will aid in Stealth.*
- *Rusty Red parts will increase rare resources extraction.*
- *Silver Limbs will increase Attack Damage.*
- *Gold Limbs will increase exploration speed.*

Other colors might come in play and affect the game mechanics in future deployments. Players can obtain new units from new deployments or trading with other players.

RESOURCES BASED NFTS

After you have claimed an Outpost, you can deploy your Mechs to gather resources, explore surroundings or stay idle. During gathering and exploration, the Mechs will bring back to the base resources of 5 essential types: Water, Ore, Rock, Energy, Organic Materials.

Every Cardano Epoch, you will be able to convert your gathered resources into unique Resource NFTs (rNFTs). Each rNFT is unique in its artistic value, but also can be used for Crafting new artifacts for the Outpost.

CRAFTING ARTIFACTS

After you have collected resources or found native objects, you can use an Outpost Crafting Station to transform them into new artifacts.

The Crafting Process is as follows:

- Select the source materials (from your wallet or your inventory) and send them to the crafting station. (If the source materials are from the 5 essential types, they will go back to the general pile to be recycled, rare materials and native objects are not recyclable. They will be burned.)
- After the items arrive to the Crafting Wallet, you can select the recipe you want to follow. (NOTE: The items should come from the same wallet, and need to share the same wallet as your Outpost, multi-wallet support is not available for Crafting.)
- The Crafting Smart Contract will create the new artifact and send it to the same wallet of the Outpost.

Crafting resources to new rNFTs will have a cost. Every Crafted rNFT will also contain a 2.5% Royalty that will go to support the continuity of the MechVerse.

ROADMAP

**Q4
2021**

- **Season 1**
Deployment 1-2-3
(2,000 units each)
- Concept Art
- White & Lite Paper
- Reddit AMA
- Marketing
- Partnerships
(YouTube, Twitter
shoutouts, etc..)
- Ignis Map Reveal

**Q1
2022**

- **Season 1**
Deployment 4 and
5 (2,000 units each)
Ignis Land
Selection
- **Unique**
NFT Art awarded
to all wallet
holders
NFT TrailBlazer
Pass awarded to
all wallet holders
NFT Lore from
Ignatius available
to mint
- Outpost Inventory
- Crafting
Mechanics details

**Q2
2022**

- Finalize Crafting
Mechanics
- Outpost concept
art
- **Unique**
NFT Lore from
second faction to
mint
- **Season 2**
new deployments
1-2-3

**Q3
2022**

- Hex Board for the
outpost
- Land grab enabled
- Land Mechanics
details
- **Season 2**
new deployments
4-5

Informational purposes only: The information set out here in is only conceptual, and describes the future development goals for MechVerse to be developed. In particular, the project roadmap is being shared in order to outline some of the plans of the MechVerse team, and is provided solely for INFORMATIONAL PURPOSES and does not constitute any binding commitment. Please do not rely on this information because ultimately, the development, release, and timing of any products, features or functionality remains at the sole discretion of the team, or their respective affiliates, and is subject to change. Further, the white paper may be amended or replaced from time to time. There are no obligations to update the white paper or to provide recipients with access to any information beyond what is provided herein.

All MechVerse content is created for entertainment purposes only.

MECH TOKEN IDO

After we have completed our first prototype and gathered input from the community. We will have an Initial Dex Offering of the MECH Token. The MECH Token will be give its holders Voting Rights in the future of the MechVerse Mechanics and Rewards (The rules of the game will be dictated by a decentralized organization). The Terms and Times of this IDO is not yet defined, and will depend on other factors such as community growth and ecosystem support. When, and if it happens, the TrailBlazer and Pioneer pass holders will have early access and preference price over other buyers.
